Céramique by Ronan Bouroullec, 2023

Céramique di Ronan Bouroullec, il debutto di Flos nel settore della ceramica, è un trio di lampade scultoree che fondono l'approccio sensibile del designer francese verso i volumi e alle silhouette con la spinta dell'azienda verso l'innovazione.

Flos' debut in ceramics, Ronan Bouroullec's Ceramique is a trio of sculptural lights that merge the French designer's sensible approach to volumes and silhouettes with the company's push towards innovation.

Negli ultimi anni la ceramica è stata al centro del percorso creativo del designer, che si è avventurato in un'esplorazione personale del design astratto. Utilizzando la ceramica come mezzo pittorico, il materiale è diventato il soggetto di una serie di bassorilievi e vasi che sono tanto composizioni espressive quanto recipienti funzionali.

Ceramics have been a key focus of the designer's creative journey over the past few years, as his personal design explorations have ventured into the abstract. Using ceramic as a pictorial medium, the material has become the subject of a series of bas-reliefs and vases that are as much expressive compositions as they are functional vessels.

A testimonianza della novità del suo materiale già dal nome, Ceramique è una collezione completamente realizzata a mano con una finitura cristallina laccata senza piombo. I colori della collezione, Moss Green, Navy Blue e Rust Red, esaltano le superfici lisce, riflettendo la ricchezza del materiale.

Testifying the novelty of its material from its name, Ceramique is an entirely handcrafted collection made of a lead-free crystalline lacquered finish. The collection's colours, Moss Green, Navy Blue and Rust Red, enhance the smooth surfaces, reflecting the material's richness.

CHIARA

Mario Bellini, 2020

Nel 1969, l'architetto italiano Mario Bellini ha presentato per la prima volta Chiara, una lampada da terra realizzata da un unico "foglio" piatto ripiegato su se stesso, come un lucido mantello di acciaio inossidabile. Cinquant'anni dopo il suo lancio, Flos riedita questo prodotto iconico in svariate dimensioni e finiture.

In 1969, Italian architect Mario Bellini debuted Chiara, a flat-packable floor lamp for Flos that wore a shiny cloak of stainless steel. Fifty years after its introduction, Flos is reissuing the icon in a range of sizes and finishes.

Last Order è erede della lampada da tavolo originariamente progettata per il nuovo ristorante Four Seasons di New York, dopo il suo trasferimento e riapertura nel 2018 con gli interni disegnati dall'architetto di San Paolo Isay Weinfeld.

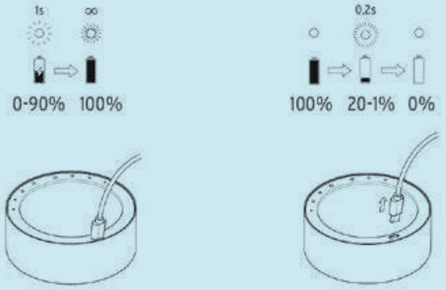

Last Order is a continuation of the table light that was originally designed for the new Four Seasons restaurant in New York City, which relocated and opened in 2018 with the interiors designed by São Paolo-based architect Isay Weinfeld.

3H CHARGING TIME

6-24H BATTERY LIFE

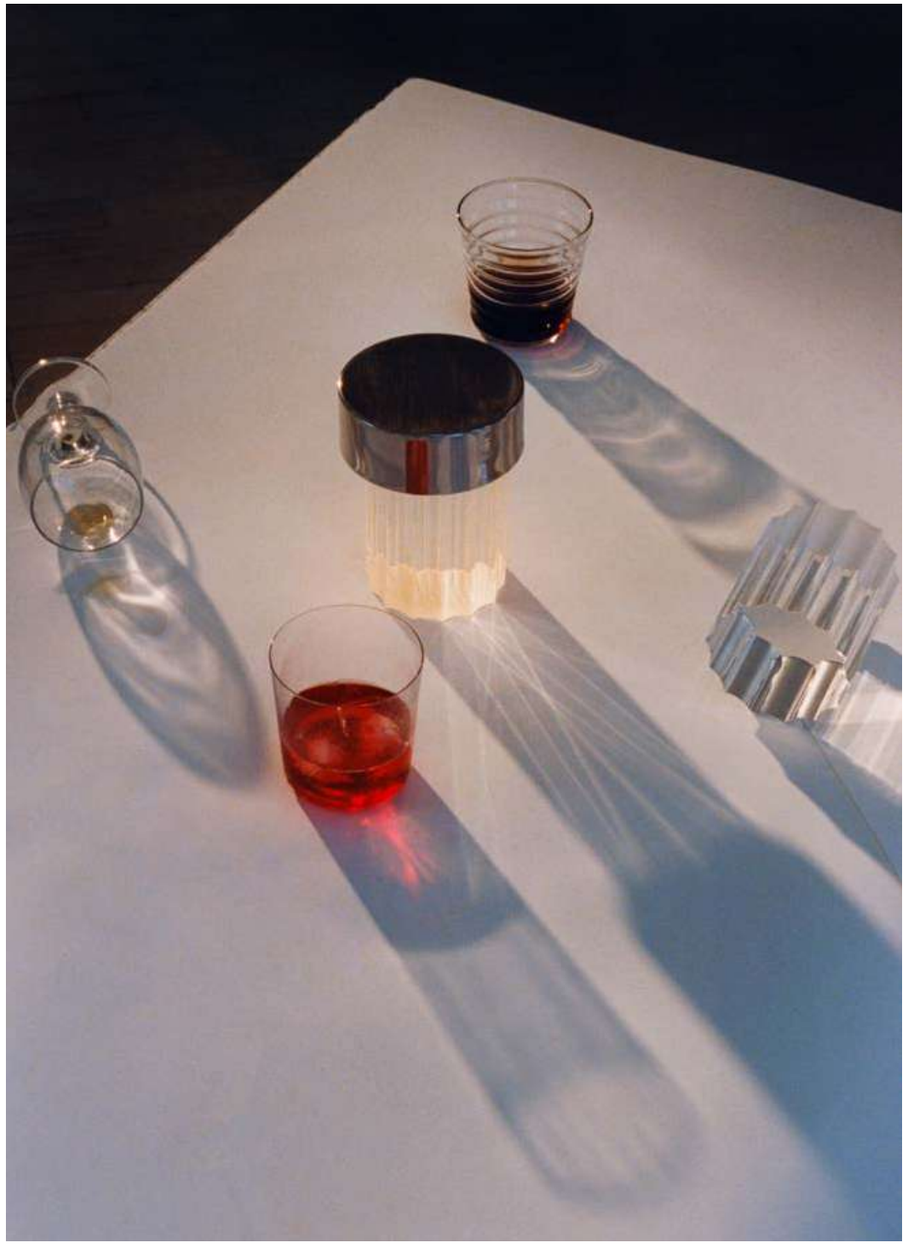

Il tempo necessario per caricare completamente il dispositivo è di 3 ore (500 cicli di carica garantiti). Con il dispositivo acceso a un'intensità del 100%, l'autonomia senza fili è di 6 ore (si possono superare le 24 ore di autonomia riducendo l'intensità). Dopo 6 ore, l'intensità diminuisce automaticamente del 20% e la necessità di ricarica viene indicata con un LED (L) che lampeggia ad alta frequenza (ogni 0,2 secondi) fino a che non si collega il dispositivo a una presa elettrica o fino al completo esaurimento della batteria.

The time required to completely charge the device is 3 hours (500 charging cycles guaranteed). With the device turned on at 100% intensity, the cordless autonomy is 6 hours (more than 24 hours of autonomy can be achieved by reducing the intensity). After 6 hours, the intensity automatically decreases to 20% and the the need to recharge is indicated: the LED indicator (L) blinks at high-frequency (every 0.2 seconds) until the device is plugged in to charge or the battery is completely discharged.

Le finiture verde opaco e acciaio lucido possono essere utilizzate anche in ambienti esterni.

Matt green and polished inox finishes can also be used in outdoor locations.

BON JOUR VERSAILLES

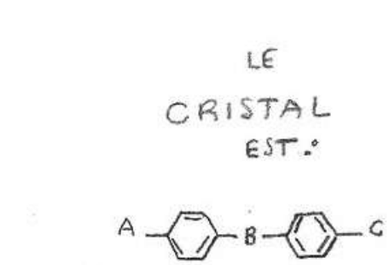

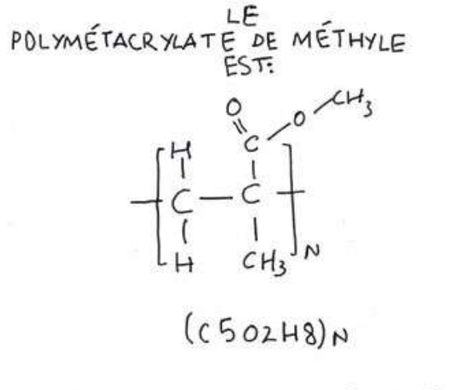

Philippe Starck, 2017

Erede della lampada “Bon Jour”, nata dalla collaborazione tra Flos e Starck, e del candeliere “Versailles” creato da Baccarat, la collezione Bon Jour Versailles - composta da due modelli, disponibili in cristallo o polimetilmetacrilato - rivela linee senza tempo, di ineffabile leggerezza ed empirica modernità, che evocano la memoria collettiva del passato, del presente e del futuro.

The heir to an earlier “Bon Jour” lamps collaboration between Flos and Starck and to the “Versailles” candle-holder created by Baccarat, the Bon Jour Versailles collection, with two models available in crystal or polymethylmethacrylate, reveals timeless lines with unfailing lightness and empirical modernity that evoke our collective memory of the past, of the present and the future.

I fratelli Achille e Pier Giacomo Castiglioni avevano ideato l'iconico riflettore a coppa in materia plastica trasparente. L'idea fu abbandonata per le deformazioni generate su di esso dal calore della sorgente luminosa a incandescenza. Il prototipo fu quindi sviluppato e prodotto da Flos nel 1962 con la celebre ed imponente coppa in vetro soffiato.
Taccia matte white è l'ultima interpretazione di questo classico contemporaneo:
la versione monocromatica e opaca della lampada ne esalta la silhouette e rende onore alla pura espressione della sua funzionalità.

In the Castiglioni brothers' original design, the iconic bowl reflector was made of transparent plastic. This idea was discarded though because the heat emitted by the incandescent light source deformed the plastic material. The prototype was then developed and produced by Flos in 1962, with its famous big blown glass bowl.
Taccia white is the latest interpretation of this contemporary classic:
The monochromatic, matte version of the lamp enhances its silhouette and honours the pure expression of its functionality.

Nella versione Motion, Skynest sembra fluttuare nell'aria in un equilibrio elegante, sostenuta da uno stelo in tinta con i colori dei paralumi. Lo stelo, agganciato al soffitto e teso verso il pavimento con un contrappeso, è quasi invisibile per via del suo spessore ridotto al minimo.

CHIARA

Mario Bellini, 1969/2020

“Un giorno ero nel mio studio
e mi è venuto in mente che si
sarebbe potuto utilizzare la luce
nel modo in cui si manifesta nel
nostro ambiente e nel nostro
paesaggio, mai diretta, ma
spesso attraversata dalle nubi o
riflessa dagli oggetti, dai muri e
dalle superfici. Quindi anziché
dire “disegniamo una lampada”
mi sono detto “disegniamo
un apparato che sia in grado
di prendere la luce da una
sorgente artificiale e rifletterla
nell’ambiente con una certa
intelligenza e grazia”...
Ho preso una forbice, un grande
foglio di cartoncino e ho iniziato
a tagliare qualche cosa che
potesse diventare un cilindro
con alla sommità un cappello
più largo che, ricongiunto sul
lato destro e sinistro, avrebbe
potuto servire da riflettore della
sorgente di luce ospitata nella
base.”
– Mario Bellini

“One day in my studio it
came to me that we could
use light the way it manifests
in our surroundings and our
landscapes—never directly,
but often through clouds or
reflected off objects, walls, and
surfaces. And so, instead of
saying ‘let’s design a lamp’, I
said, ‘let’s design an apparatus
that can take light from an
artificial source and send it
back into our surroundings
with a certain intelligence and
grace’... I took some scissors, a
big piece of card, and I started
to cut out something that could
be made into a cylinder with
a wide hat on top that, when
joined on the right and left-hand
side, would act as a reflector of
the light source housed in the
base.”

Una luce che consiste in due cilindri indipendenti che si toccano in direzione perpendicolare. Uno ha il ruolo di fonte luminosa, mentre l'altro serve da base. L'angolazione del proiettore può essere regolata su tre posizioni: 25, 40 e 60 gradi, inserendo un perno fissato sulla base. Le diverse funzioni sono rese possibili grazie all'esclusione di elementi superflui e alla semplificazione della forma.

LUCE ORIZZONTALE

Luce Orizzontale by Ronan & Erwan Bouroullec, 2022

Ronan & Erwan Bouroullec, 2022

Nata da un ambizioso progetto di Flos Bespoke, il design di Luce Orizzontale è la sintesi della complessità artigianale del concetto: una struttura modulare a incastro composta da elementi tubolari di vetro spesso, sospesi in modo minimale dal soffitto.

Originating from an ambitious Flos Bespoke project, the design of Luce Orizzontale distils the concept's artisanal complexity: an interlocking, modular structure composed of tubular elements of thick glass, minimally suspended from the ceiling.

La configurazione modulare della lampada prevede 8, 10 o 12 tubi di vetro fuso (le dimensioni variano da un metro e mezzo a due metri e mezzo) e strutture di sospensione di diverse lunghezze. I cilindri di vetro sono sostenuti da una barra di alluminio lucidato, mentre le sorgenti luminose, due strisce di LED che dirigono la luce verso l'alto e verso il basso, sono inserite nella barra e possono essere dimmerate attraverso un sistema situato a un'estremità della barra stessa.

The lamp's modular configuration includes 8, 10 or 12 cast glass tubes (its size ranging from one and a half metres to two and a half metres), and hanging structures of different lengths. The glass cylinders are supported by a polished aluminium bar, while the light sources, two LED strips pushing the light upwards and downwards, are inserted in the bar, and can be dimmed through a system located at one end of the bar.

Il linguaggio irriverente e poetico di Marcel Wanders Studio trova una nuova espressione in Skynest, l'ultimo progetto di illuminazione per Flos. Un'unione di eleganza formale e innovazione tecnica, Skynest presenta un'innovativa striscia LED, intrecciata con un elemento tubolare in tessuto per creare una forma a cesto che è artigianale quanto sofisticata.

Seguendo l’approccio decorativo di Skygarden (un progetto che lo studio ha completato per Flos nel 2007, una cupola con al suo interno un decoro floreale a rilievo), Skynest porta il lavoro Marcel Wanders Studio verso nuovi orizzonti, arricchendo il suo approccio umanistico e poetico con un nuovo modo di fare innovazione, sostenibilità e tecnologia.
Il Direttore Creativo dello studio, Gabriele Chiave, parla della duplice natura di Skynest e dell’esperienza di progettare con la luce.

Following on from the decorative approach of Skygarden (a 2007 design by the studio concealing a relief of flowers within a domed lamp), Skynest takes Marcel Wanders Studio in a new direction, enriching its humanistic, poetic approach with a new world of innovation, sustainability and technology. The studio's Creative Director, Gabriele Chiave, talks about the dual nature of Skynest and the experience of designing with light.

L'ispirazione da cui nasce Almendra si legge subito dalla sua silhouette, un connubio perfetto tra il rigore geometrico e le curve tratte dal mondo vegetale. Il legame con la natura, tuttavia, non è puramente formale, anzi, si accompagna ad una attenta progettazione finalizzata a ridurre al massimo l'impatto ambientale.

The inspiration for Almendra can immediately be seen in its silhouette, a perfect combination of geometric rigour and curves drawn from the world of plants. Its connection with nature, however, is not strictly formal. On the contrary, it underlies a careful design aimed at minimizing environmental impact.

I petali di Almendra, sia nella loro faccia opaca sia in quella trasparente, sono realizzati in uno speciale policarbonato che, anziché essere derivato dal petrolio, è derivato da un sottoprodotto della produzione della carta.
Un materiale plastico sostenibile, proveniente da risorse rinnovabili, di origine naturale ma che tuttavia non consuma inutilmente terreno ed acqua con coltivazioni specifiche per la sua produzione.

Both the opaque and transparent faces of the petals are made of a special polycarbonate deriving from a by-product of paper production rather than from petroleum. Achille Castiglioni & Pio Manzù

Per il suo 50° anniversario nel 2021, Parentesi torna in due tonalità che rendono omaggio ai suoi creatori, curate in collaborazione con la Fondazione Achille Castiglioni e la Fondazione Manzoni/Archivio Pio Manzù. I nuovi colori includono il Turchese, ispirato al colore della vernice usata da Castiglioni in tutta la sua casa (e nel suo studio), e l'Orange Signal preferito da Manzù per molti dei suoi prototipi automobilistici e creazioni di design industriale. L'edizione dell'anniversario ha anche una base in silicone con gli stessi colori in coordinato.

For its 50th anniversary in 2021, Parentesi returns in two shades that pay tribute to its creators, curated in collaboration with Fondazione Achille Castiglioni and Fondazione Manzoni/Archive Pio Manzù. The new colours include a Turquoise inspired by the paint colour used by Castiglioni throughout his home (and carefully recorded by the architect in his studio), and the Orange Signal preferred by Manzù for many of his automotive prototypes and industrial design creations. The anniversary edition also features a silicone base in matching colours.

Le diverse componenti di Parentesi, sono compattate in un imballaggio piccolo e leggero, perciò i costi di trasporto sono molto bassi. I due autori, Manzù e Castiglioni, non avevano previsto che in questo modo si potesse limitare anche l'impatto ambientale: una confezione leggera riduce il consumo di carburante necessario per il trasporto.

Quando abbiamo deciso di riproporre la confezione originale, trasparente e con la maniglia, abbiamo chiesto di utilizzare PET completamente riciclato derivato dal ciclo di recupero di materiali di scarto come le bottiglie in plastica. Per sua natura, il PET è perfettamente riciclabile, quindi se non si vorrà conservare la confezione disegnata da Achille Castiglioni, basterà gettare i due gusci nel bidone della raccolta differenziata.

The different components of Parentesi are compacted into a small, lightweight package, so transport costs are very low. The two authors, Manzù and Castiglioni, had not foreseen that this would also reduce the environmental impact: a light package reduces the fuel consumption necessary for transport.

When we decided. to reintroduce the original packaging, transparent and with a handle, we asked to use completely recycled PET derived from the recovery cycle of waste materials such as plastic bottles. By its nature, PET is perfectly recyclable, so if you don't want to keep the Achille Castiglioni-designed packaging, just throw the two shells in the recycling bin.

DIABOLO

“Mio padre era veramente un ottimo giocatore di Diabolo”, dice Giovanna Castiglioni, figlia del leggendario designer italiano Achille Castiglioni. Parla di uno dei passatempi preferiti del padre, il gioco di destrezza derivante dallo yo-yo cinese, in cui un oggetto a forma di clessidra viene fatto correre avanti e indietro su un cordino tra due bacchette. Nel 1998 l’antico numero di giocoleria è servito da ispirazione per l’ultima collaborazione di Achille con Flos: l’omonima lampada a sospensione regolabile.

‘My father was a really, really good Diabolo player’, says Giovanna Castiglioni, daughter of legendary Italian designer Achille Castiglioni. She’s discussing one of his favorite pastimes—the juggling game, derived from a Chinese yo-yo, in which an hourglass-shaped object is spun back and forth on a string between two sticks. In 1998 the age-old balancing act served as inspiration for Achille’s final collaboration with Flos—an adjustable pendant lamp with the same name.

La nuova collezione di lampade è realizzata in moduli di vetro soffiato, trasparenti e dunque quasi inesistenti durante il giorno. Ma se accesi nell'oscurità si trasformano in splendide lampade illuminate. I moduli in vetro a forma cilindrica sono i fondamenti della collezione.

The new collection of lamps is made of blown glass modules, which are see-through and therefore almost inexistent at day-time. But, when you switch them on in the dark, they transform into georgeous, illuminated lamps. The cylindrical glass modules set the basic grammar of the collection.

“Quando viaggio in treno, osservo sempre quei cavi elettrici fuori dal finestrino. E’ cosi bello e poetico il modo in cui collegano i tralicci gli uni agli altri e, al contempo, spezzano il paesaggio. Volevo tradurre tutto ciò in architettura d’interni”
- M. Anastassiades

“When I sit on a train travelling, I always see these strings of electricity out of the window. It’s so beautiful and poetic the way they connect the pylons but at the same time they divide the landscape. I wanted to translate this into interior architecture.”

Black Flag

Black Flag Pro

Black Flag di Konstantin Grcic è una lampada da parete estendibile che offre flessibilità di illuminazione grazie ai bracci in alluminio che si allungano fino a 3,5 metri a partire da una struttura a parete dello stesso materiale; un esercizio del modo in cui il minimalismo, unito alla tecnologia, può reinventare la funzionalità.

Black Flag is an extendable wall light that offers flexibility of illumination thanks to the expanding aluminium arm reaching up to 3.5meters from a wall-mounted frame of the same material. Wall lamp and sculptural centrepiece, Black Flag embodies Grcic's industrial design expertise and demonstrates the experimental opportunities of his approach mixed with Flos' technical expertise.

Same ingenious design, smaller size.
Paolo Rizzatto's 265 returns in a diminutive version, a companion to the original that maintains its precise proportions with a more compact form.

Dal lancio di Bellhop Table nel 2017, il design di Barber & Osgerby si è evoluto dando vita a una famiglia di oggetti che si avventurano in diverse aree e funzioni dell'illuminazione. Da lampada compatta e ricaricabile, Bellhop è diventata un apparecchio di illuminazione da terra e una luce da esterno. Nella sua ultima versione, Bellhop si integra nell'architettura, appollaiandosi con tutto il suo colore sulla parete e spingendo la luce verso l'alto grazie alla nuova tecnologia ottica ad alte prestazioni di Flos. Il nuovo design mantiene la forma distintiva della lampada, con il paralume capovolto e declinato in una serie di ricche tonalità che ben si integrano con il suo design audace.

Since launching Bellhop Table in 2017, the design by Barber & Osgerby has evolved into a family of objects that branch out into different areas and lighting functions. From a compact rechargeable lamp, Bellhop has become a floor-standing uplighter and an outdoor light. Now in its latest iteration, Bellhop is integrated into the architecture, colourfully perching on the wall and pushing light upwards thanks to Flos' new, high performance
optic technology. The new design maintains the lamp's distinctive shape, with the cap twisted upside down and declined in a series of rich hues that well complement its bold design.

COORDINATES

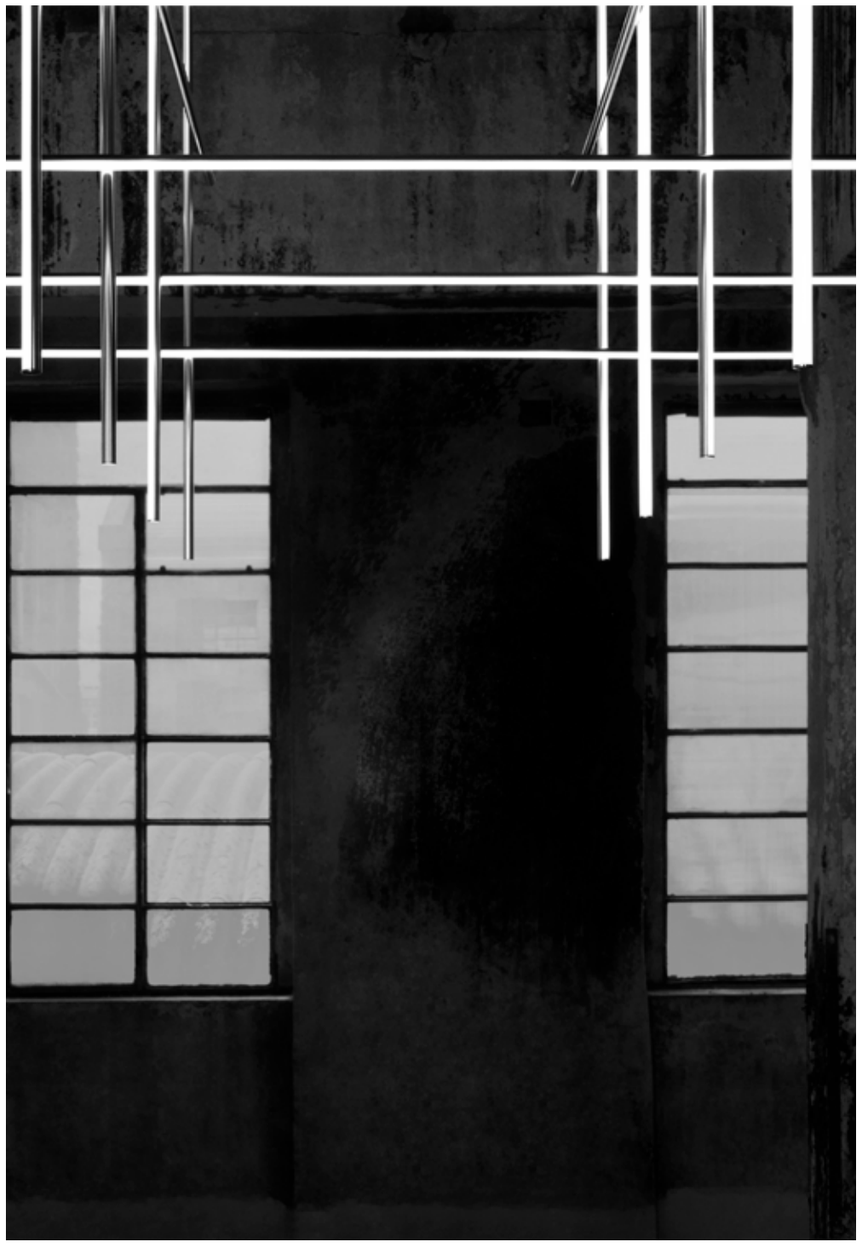

Michael Anastassiades, 2020

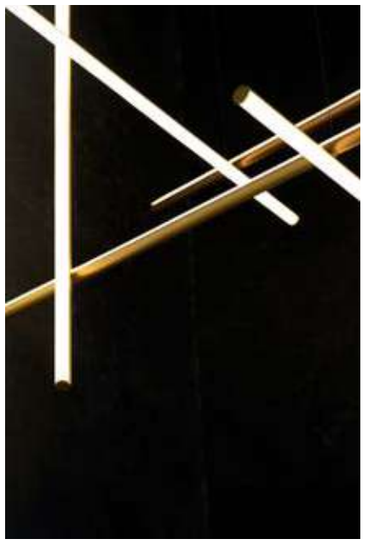

Coordinates è una collezione di luci dal forte impatto visivo, disegnate in origine da Michael Anastassiades per il leggendario ristorante Four Seasons di New York. Caraterizzata da barre di LED lineare saldamente intrecciate, la sua forma sembra ispirarsi alla precisione matematica di una griglia cartesiana, illuminata ed estesa in brillanti volumi tridimensionali.

A dramatic lighting collection originally designed by Michael Anastassiades for New York's legendary Four Seasons restaurant, Coordinates features a series of interlocking linear LED luminaires that take their formal inspiration from the mathematical precision of the Cartesian grid, illuminated and expanded to three brilliant dimensions.

Coordinates è composta da un corpo in alluminio estruso, dalla sofisticata finitura anodizzata color champagne, e da un diffusore bianco opale in silicone platinico. Rigorosa, elegante e facilmente adattabile, questa collezione rappresenta una soluzione flessibile e allo stesso tempo formalmente impeccabile per illuminare tante diverse tipologie di ambienti, regalando il massimo impatto scenografico con un minimo tocco magico.

Coordinates is made from extruded aluminium with a sophisticated anodised champagne finish, and an opal-white platinic silicone diffuser. Exact, elegant, and easily adaptable, this collection offers a flexible yet formally rigorous solution for a diverse range of indoor environments, providing maximum impact with a minimal touch.

FLAUTA

High-definition renderings by Pablo Limón

In Flauta Riga, una serie di incisioni sapientemente calibrate sulla superficie tracciano un segno caratterizzato da puro rigore e riferimenti classici. La peculiarità di Flauta Spiga è invece il motivo a spina di pesce, sinonimo di eleganza e dettaglio sofisticato: un gioiello dal gusto antico e dal raffinato design contemporaneo. L'accessorio deflettore, il cui colore si abbina al corpo della lampada, si può installare sulla testa superiore o inferiore. Fissato da magneti e viti di sicurezza, crea un effetto decorativo con la luce riflessa.

In Flauta Riga, a series of skillfully calibrated etchings on the surface trace a sign characterised by pure rigour and classical references. Flauta Spiga is characterised by a herringbone pattern, a synonym of elegance and sophisticated detail: a jewel with ancient taste and a refi ned contemporary design.
The deflector accessory, painted to match the lamp body, can be installed on either the upper or lower head. Held in place by magnets and safety screws, it creates a decorative effect with reflected light.

Il sistema di fissaggio a parete permette di appendere lo specchio come un quadro.

The wall fixing system that allows you to hang the mirror like a picture.

In alto: La Plus Belle è progettata per fornire il meglio della luce. Sotto il suo diffusore in silicone ottico si nascondono LED speciali assemblati in modo molto frequente per aumentare l'uniformità di diffusione e forniscono una performance unica grazie alla combinazione eccezionale di un indice di fedeltà cromatica (CRI) pari a 95 più un indicatore di stabilità dei rossi superiore a 90 (R9>90). Inoltre, la luce di La Plus Belle è gradevole e morbida (2700K) e gestibile dal dimmer a sensore integrato nello specchio.
A destra: La cornice di La Plus Belle è realizzata in una speciale lega di alluminio che consente di ottenere colorazioni anodiche di elevatissima qualità. Le finiture disponibili si dividono in anodizzato spazzolato (oro, rame) o anodizzato lucidato (bronzo, alluminio naturale).

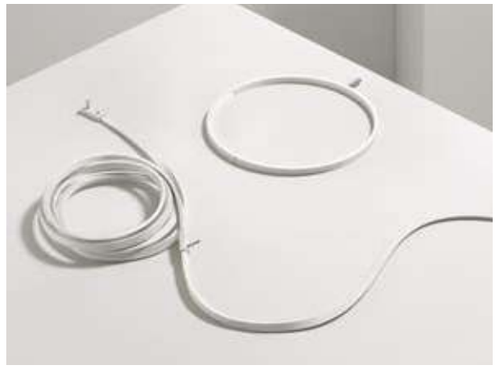

Top: La Plus Belle is designed to provide the best possible light. Special LEDS are hidden beneath the optical silicone diffuser, assembled in a very frequent mode to increase the uniformity of the diffusion and provide a unique performance thanks to the exceptional combination of a chromatic rendering index (CRI) of 95 plus a reds stability indicator of over 90 (R9>90). Furthermore, the light from La Plus Belle is pleasant and soft (2700K) as well as manageable by the dimmer with a sensor integrated in the mirror.
Right: The frame of La Plus Belle is made of a special aluminium alloy that provides the best possible extremely high quality anode colourations. The finishes available are brushed anodized (gold, copper) or polished anodized (bronze, natural aluminium).

Paolo Rizzatto, 1973

Il design della 265 di Rizzatto è tanto semplice e intuitiva quando tecnico e preciso: una lampada a parete da sospensione, costituita da un cappello e un peso, ciascuno in equilibrio alle estremità di un braccio regolabile e fissato a muro in una posizione asimmetrica. Nel progetto di Rizzatto, ciascuna parte era caratterizzata da un colore primario scelto in modo specifico: il cappello, l'elemento più importante, era disegnato in rosso, il peso era giallo e il braccio di collegamento blu. La lampada fu poi prodotta in tonalità più tenui e sebbene sia normalmente disponibile in bianco e nero, la proposta cromatica originale di Rizzatto ora sta facendo il suo ritorno nel catalogo Flos per celebrare l'idea originale dell'architetto.

The design of Rizzato's 265 is as simple and intuitive as it is technical and precise: a suspended wall lamp comprising a head and weight, each balanced at the extremities of an adjustable arm, and attached to the wall in an asymmetric position. In Rizzatto's design, each part featured a specifically chosen primary colour: the head, the most important element, was drawn in red, the weight was yellow and the connecting arm, blue. The lamp was eventually produced in more muted shades, and while it is normally available in black and white, Rizzatto's original colour proposal is now making its way onto the Flos catalogue to celebrate the architect's original thinking.
The deflector accessory, painted to match the lamp body, can be installed on either the upper or lower head. Held in place by magnets and safety screws, it creates a decorative effect with reflected light.
