Somos fabricantes

We are manufacturers

En B.lux somos fabricantes de luminarias de diseño contemporáneo desde 1979. Nuestros productos se distribuyen en 65 países de los cinco continentes. Esta destacada presencia internacional es posible gracias al riguroso control de los procesos de fabricación y distribución del que gozan nuestras luminarias. Apostamos por las relaciones largas y duraderas basadas en la confianza entre fabricante y cliente. Nuestro éxito se fundamenta en un crecimiento pausado, sostenido en el tiempo, con pasos seguros. No hay secretos, sino el resultado natural de nuestra dedicación y talento de nuestro equipo para darte el mejor servicio.

In B.lux we are manufacturers of contemporary design lamps since 1979. Our products are distributed in 65 countries on five continents. This outstanding international presence is possible thanks to the rigorous control of the manufacturing and distribution processes to which we subject our luminaires, allowing them to meet and exceed the most demanding quality standards. We are committed to long-lasting relationships based on trust between manufacturer and customer. Our success is based on a slow growth, sustained over time, which advances with secure steps. There are no secrets – this is the natural result of our team's dedication and talent focused on offering the best service.

Aspen SH

by
Werner Aisslinger

**Decorative
lighting**

Sistema lineal de suspensión que permite combinar las pantallas de las luminarias Aspen 17 (Aspen SH E27 / LED). Está formado por una estructura tubular disponible en tres longitudes, que permite instalar las pantallas a diferentes distancias. Estructura pintada en acabado negro mate. Las pantallas de aluminio de Aspen están disponibles en estos acabados: aqua, black, brass, clear turquoise, grey, lemon, limestone, mango, merlot, river, rose, sea, snow y terracota.

Linear suspension system that allows combining the shades on the Aspen 17 lamps (Aspen SH E27 / LED). Consists of a tubular structure available in three lengths that allows installing the shades at different distances. Structure painted in a matte black finish. The Aspen aluminium shades are available in these finishes: aqua, black, brass, clear turquoise, grey, lemon, limestone, mango, merlot, river, rose, sea, snow and terracota.

Berry

by
Stone Designs

**Decorative
lighting**

La colección Berry cuenta con una cabeza lumínica dotada de un sistema magnético que nos permite moverla a nuestro antojo. La familia incluye luminarias de suspensión, de aplique y de pie.

Berry está fabricada en aluminio y cuenta con una fuente de luz LED con una óptica concentrada, lo que nos permite centrar y enfocar la luz en el espacio. Su tamaño es de 8 cm de diámetro y cuenta con una altura total de 35 cm.

La colección Berry se presenta en cuatro acabados diferentes: beige, blanco, negro y bronce.

The Berry collection showcases a lamp equipped with a magnetic system that enables us to adjust its position as desired. The family includes a suspension lamp, a wall lamp, and a floor lamp.

Berry is made of aluminum and features an LED light source with a concentrated optic, allowing us to focus and direct the light in the space. It has a diameter of 8 cm and a total height of 35 cm.

The Berry collection is available in four different finishes: beige, black, white and bronze.

Crosshatch

by
Brad Ascalon

**Decorative
lighting**

Crosshatch está formado por una estructura reticular metálica en tres formatos (S/M/L) disponibles en versión techo y pared y dos formatos (M/L) en versión suspensión. Gracias a su cableado interno, se pueden combinar entre ellos para crear múltiples composiciones con tan solo una acometida. La ligereza de su estructura permite crear grandes volúmenes sin recargar el espacio. Su mayor atractivo reside, precisamente, en el juego de vacíos y luces que genera allí donde se instala.

Como fuente de luz emplea un LED (18W 1800lm 2700K) regulable por corte de fase, que se aloja en un difusor de vidrio opal blanco de 15 centímetros de diámetro. El conjunto garantiza un óptimo confort visual, así como una ausencia total de deslumbramiento.

La versión a pared ofrece también la posibilidad de incorporar baldas para la colocación de libros o accesorios de decoración.

Crosshatch is made up of a metallic structure in three sizes (S/M/L) available in ceiling and wall versions and two sizes (M/L) for the suspension version. Thanks to its internal wiring, they can be combined to create multiple compositions with just one power supply. The lightness of its structure allows us to create volumes without overloading the space. Its main appeal lies precisely in the game of voids and lights that it generates wherever it is installed.

As a light source, it uses a dimmable LED (18W 1800lm 2700K), which is housed in a white opal glass diffuser with a diameter of 15 centimeters. The whole set guarantees optimal visual comfort as well as a complete absence of glare.

The wall version also offers the possibility of incorporating shelves for books or other decorative accessories.

Crosshatch System

by
Brad Ascalon

**Decorative
lighting**

Crosshatch System nos permite ir más allá y crear sistemas totalmente personalizados combinando tubos, fuentes de luz y crucetas simples o dobles a nuestro antojo.

Crosshatch System puede crecer tanto horizontal como verticalmente y los tamaños son totalmente personalizables. Además, podemos crear ángulos para pasar de un sistema de pared a un sistema de suspensión o techo y ajustar así el sistema a las necesidades de nuestro espacio.

Crosshatch System allows us to go further and create fully customized systems by combining tubes, light sources, and single or double crosses according to our preferences.

Crosshatch System can expand both horizontally and vertically, and the sizes are completely customizable. Additionally, we can create angles to transition from a wall system to a suspension or ceiling system, adjusting the system to fit the needs of our space.

Kupetz

by
E27, Tim Brauns

**Decorative
lighting**

Kupetz es un sistema de iluminación tridimensional compuesto por diferentes fuentes de luz y uniones, cuya composición permite adecuar la iluminación a las necesidades de cada espacio.

Se trata de un sistema tubular metálico cuya estructura va siempre en acabado negro mate, que permite combinar cinco tipos de fuente de luz: dos esferas de vidrio blanco opal (100 Glass y 150 Glass), otras dos esferas de vidrio ahumado (100 Glass y 150 Glass) y un proyector con difusor opal (Diffuser). El proyector y la base de las esferas de vidrio están disponibles en tres acabados: negro, cobre, y oro.

El sistema lleva una sola acometida eléctrica y se suspende mediante cables de acero. Funciona a 230V, por lo que es posible realizar composiciones múltiples con una gran cantidad de elementos.

Kupetz is a three-dimensional lighting system made using different lighting sources and linear unions. Its arrangement allows us to adjust the lighting to each space.

It is a metal tubular system whose structure comes in a matte black finish where you can combine five types of light sources: two opal white glass spheres (100 Glass and 150 Glass), two more smoked glass spheres (100 Glass and 150 Glass) and a spotlight with opal diffuser (Diffuser). The spotlight and the base of the glass spheres come in three different finishes: black, copper and gold.

The system operates on a single electrical connection and is suspended by steel cables. It functions at 230V, allowing for multiple compositions with a large number of elements.

Ring

by
ILMIODESIGN

**Decorative
lighting**

La colección Ring está disponible en versión de sobremesa, pie, pared y suspensión. La versión de pared puede ser tanto individual como doble y la de suspensión está disponible en formato individual, doble con diferentes longitudes (110-130-150) o múltiple de seis elementos. Todas las versiones incorporan dos vidrios salvo la versión a pared, que solo tiene uno.

Ring se fabrica en los acabados blanco, negro y latón. La versión en latón combina la estructura en negro. Como su propio nombre indica, la colección Ring parte de un anillo metálico de 25 centímetros de diámetro que alberga en su interior dos lámparas E14 con un difusor de vidrio de 15 centímetros dispuesto asimétricamente. Esto genera una sensación de vacío y ligereza visual. La alta capacidad de difusión del vidrio garantiza una excelente calidad de luz y un gran confort visual.

El vidrio puede personalizarse con números (Ring W Numbers), empleándolo como iluminación de señalética.

The Ring collection is available in table, floor, wall, and suspension versions. The wall version can be single or double, and the suspension version is available in individual, double with different lengths (110-130-150), or multiple format with six elements. All versions incorporate two glasses except for the wall version, which has only one.

Ring is manufactured in white, black, and brass finishes. The brass version combines the structure in black finish. As its own name suggests, the Ring collection starts from a metal ring with a diameter of 25 centimeters that houses two E14 lamps with a 15 centimeter glass diffuser arranged asymmetrically inside. This generates a feeling of emptiness and visual lightness. The high diffusion capacity of the glass ensures excellent light quality and great visual comfort.

The glass can be customized including numbers (Ring W Numbers), allowing us to use it as signage lighting.

Slim Skin

by
AIA Salazar-Navarro

**Decorative
lighting**

La colección Slim Skin se compone de una versión de suspensión vertical, una de suspensión horizontal y una de pared. Todas ellas tienen un diámetro de 12 cm y están disponible en dos longitudes diferentes: 70 cm y 150 cm.

Slim Skin se compone de un cilindro de vidrio (a elegir entre opalino o cristal transparente estriado) revestido de una malla metálica de acabado latón o negro que genera un efecto muaré, evitando así cualquier deslumbramiento y transmitiendo un gran confort visual.

The Slim Skin collection consists of a vertical suspension, a horizontal suspension, and a wall version. All of them have a diameter of 12 cm and are available in two different lengths: 70 cm and 150 cm.

Slim Skin is composed of a glass cylinder (available in opal white or ribbed clear glass) coated with a metal mesh in brass or black finish. The metal mesh creates a moiré effect which avoids any glare and provides great visual comfort.

Un efecto muaré fino y elegante cuya
disposicion genera un gran confort
lumínico sin afectar al flujo de luz.

A fine and elegant moire effect whose
arrangement generates great
lighting comfort without affecting
the light flow.

Blokinline

Architectural lighting

Blokinline es un sistema de iluminación arquitectural basado en un carril de tamaño compacto (6 mm x 16 mm), regulable y que trabaja a 48V. Al carril le añadimos elementos individuales de alto flujo lumínico que pueden moverse de forma independiente a lo largo de este. El sistema está disponible tanto en versión superficie como suspensión.

Blokinline se compone de esferas de vidrio opal (100/150 mm), proyectores, módulos múltiples de luz directa de 2 y 4 spots con reflectores de diferentes ángulos de apertura (38°/60°) y elementos de luz lineal adosados, suspendidos u orientables. El sistema de carriles móviles nos posibilita realizar composiciones variadas e infinitas, añadiendo incluso cruces y ángulos de 90° y 180° en distancia horizontal y vertical.

Las fuentes de luz de la colección Blokinline están disponibles en los acabados bronce, latón, negro y blanco, mientras que el carril siempre se muestra en acabado negro.

Blokinline is an architectural lighting system based on a compact track (6 mm x 16 mm), dimmable, and operating at 48V. We can move all the individual high lumen output elements along the track. The system is available in both surface-mounted and suspended versions.

Blokinline consists of two opal glass spheres (100/150 mm), projectors, lighting modules with 2 and 4 spotlights with reflectors of different beam angles (38°/60°) and linear lighting elements attached, suspended, or adjustable. The movable track system allows us to create varied and infinite compositions, even adding crosses and 90° and 180° angles in horizontal and vertical distance.

The light sources in the Blokinline collection are available in bronze, brass, black, and white finishes, while the track is always displayed in black.

El mundo del carril llevado a la mínima expresión. Optimizando al máximo la luz. Acabados sutiles y elegantes con el **mínimo tamaño y el máximo rendimiento**.

A track taken to its simplest form. With maximum optimization of light. Subtle and elegant finishes with **minimal size and maximum performance**.

TECHNICAL INFROMATION

- Voltage (Input): 0 - 60 V dc
- Rated Current: max. 10A - 1A data bus
- Max functioning T: 70°C (Ta 25°C)
- Class II (SELV)
- UL approval 48V-2A Class 2 - 1A data bus
- Maximum weight of the lighting fixture: 5N with adapter
- Tracks to be used in NON polarized versions
- Plastic components available only for NON polarized versions
- Use only NON polarized electronics
- Adapters are NOT to be inserted in bends.
- ATTENTION: to limit the risk of overheating and fire, do not short-circuit the conductors

C_Ball W Outdoor

by
Stone Designs

Outdoor
lighting

Está formada por una esfera de vidrio opal, cuyas características le otorgan un elevado grado de resistencia a los rayos UVA, así como una inmejorable calidad de luz. Las partes metálicas de este aplique de exterior están disponibles en diferentes acabados: negro, beige, turquesa y corten. C_Ball Outdoor W completa la colección C_Ball de interior, que está formada por una luminaria de mesa, otra de pie, dos suspensiones y dos apliques.

C_Ball W Outdoor is formed by an opal glass sphere, the characteristics of which give it a high degree of resistance against UVA rays, as well as excellent light quality. The metal parts of this outdoor wall lamp are available in different finishes: black, beige, turquoise and a corten-effect finish. C_Ball Outdoor W completes the C_Ball indoor collection, comprised of a table lamp, a floor lamp, two suspension lamps and two wall lamps.

Sis Outdoor

by
María Güell and Carrasquet

**Outdoor
lighting**

La versión exterior de la colección Sis desarrolla todas las características técnicas de su homónimo de interior en lo relativo a calidad de luz, empleo de ópticas de cristal, ausencias de deslumbramiento, etc. en un ámbito de exterior en el que aporta ligereza y minimalismo en lo que a imagen se refiere.

La lente de sólido de cristal asegura una calidad de luz que no se verá alterada por los agentes externos a los que puede estar expuesta la luminaria, tales como el agua, la emisión de rayos uva, etc.

The outdoor version of the Sis collection replicates all the technical features of its indoor counterpart in terms of light quality, the use of glass optics, absence of glare, etc., in an outdoor setting where it brings a sense of lightness and minimalism.

The solid glass lens ensures light quality that will not be affected by external factors that the luminaire may be exposed to, such as water, UV radiation, etc.

Soft

by
Josep Lluís Xuclà

**Outdoor
lighting**

Soft es una familia de luminarias de exterior que incluye un bolardo y dos apliques a pared. La característica principal de los bolardos –que emiten una luz perimetral de 360°– es la ausencia de deslumbramiento y el control de la luz, lo que permite un uso paisajístico que se integra totalmente en el entorno. Los apliques de pared, por otro lado, permiten la creación de efectos de luz indirecta o luz directa bañadora de pared (wall washer).

La colección Soft está fabricada en aluminio y policarbonato y está disponible en tres acabados diferentes: negro, beige y kakhi. El bolardo cuenta con una cabeza cuyo diámetro es de 15 cm y una altura de baliza de 45 o 60 cm. El aplique, por su lado, puede ser de 10 o 15 cm.

La luminaria de exterior se adapta perfectamente a todo tipo de entornos, lo que la hace perfecta tanto para proyectos residenciales como para contract.

Soft is a family of outdoor lamps that includes a bollard and two wall fixtures. The main feature of the bollards – which emit a 360° perimeter light– is its absence of glare and its control of the light, allowing a landscape use that blends seamlessly into any environment. The wall-mounted fixtures, on the other hand, allows us to create indirect or direct lighting effects (wall-washing light).

Soft collection is made of aluminium and polycarbonate and is available in three different finishes: black, beige, and khaki. The bollard has a 15 cm diameter head and a height of either 45 or 60 cm. The wall-mounted fixture can be either 10 or 15 cm.

The outdoor lamp adapts perfectly to all types of environments, making it ideal for both residential and contract use.
